DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 and 6-13 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art, individually or in combination, fails to disclose, teach or suggest a route guidance learning device comprising route guidance changing means for changing the route guidance, prior to the route guidance for the searched route, on the basis of information on the previously determined route deviated positions stored in the route deviant position storing means, such that the outputted route guidance avoids the previously determined route deviated positions. The closest prior arts, Lefebvre (US 5,243,528) and Suzuki et al (JP 2000009484) disclose navigation systems that, with regard to Lefebvre, route guidance changing means for changing the route guidance, prior to outputting the route guidance for the searched route, on the basis of information input by the user, such as taking the shortest route, avoid certain roads/areas etc. Suzuki et al discloses route deviant position storing means for storing the newly determined route deviated position and previously determined route deviated positions were determined when the searched route was last traveled. Neither Lefebvre or Suzuki et al disclose the route guidance changing means for changing the route guidance, prior to outputting the route guidance for the searched route, on the basis of information on the previously determined route deviated positions, such that the outputted route guidance avoids the previously determined route deviated positions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
